DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a semiconductor device and a method for manufacturing thereof with all exclusive limitations as recited in claims 1, 9, and 18, comprising a semiconductor substrate having integrated circuits, a plurality of bonding pads electrically connected to the integrated circuits, interconnections respectively electrically connected to the bonding pads, resin layers covering the interconnections, concaves formed such that each being disposed in a corresponding portion of the resin layers that cover the interconnections, through-holes formed by removing bottoms of the concaves, and external connection terminals formed on a corresponding area of the interconnections exposed through the through-holes, the through-holes being formed by a process different from that of the concaves.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

U.S. Patent 6,177,731 to Ishida et al. discloses a semiconductor package having a semiconductor chip comprising a rewiring layer and an external connection, the external connection formed in a hole and by a low melting point eutectic solder.
